JR team pilot Sam Filippelli
entrusted his aircrafts to Red Plane

Sam's Yak-54, with 3W-157 on Snap-Stand,
model oak-700 mm

snap-stand

Give your aircraft some rest!

Snap Stand fits to almost any kind of airplane – small or big. Especially it is important to have this tool when fly giant scale planes. These flying machines are complex to maintain, they are heavy and bulky and they want to be taken care with special attention.

Snap-Stand can safely carry weight up to 60 pounds (30 kg) if assembled and used according the manual.

Only high quality hardware is included in the kit.
Snap-Stand can be made of poplar, oak or maple.
Some size modification could be made by special order.
Prices start from CA144.95
Shipping cost minimized - calculated individually

Snap-Stand can be laid down for storage or transportation easily.

Snap-Stand can used at the field for assembly, service, cleaning, repair etc - you name it!
You can also use it not at the field only, but in your workshop!
It's very handy tool when you just start building your plane from scratch and when you finishing it.
Use Snap Stand to install the landing gear, or to service the engine.
